

A scatter plot with a white background and a black border. The x-axis and y-axis both range from -15 to 15, with major tick marks and labels at intervals of 5. The plot contains three distinct groups of data points: a large, dense cluster of gray points centered around (-2, -2); a smaller, dense cluster of cyan points centered around (-1, -1); and a few outliers, including a single purple point at approximately (-3, 4) and a single magenta point at approximately (-2, -11). There are also several small, loose clusters of gray points in the upper right and lower right corners of the plot area.

A scatter plot with a large cluster of gray points centered around (0,0). A smaller, denser cluster of cyan points is also centered around (0,0). Two outlier points are visible: a magenta point at approximately (5, 0) and a blue point at approximately (2, -12). The x-axis ranges from -15 to 15, and the y-axis ranges from -15 to 15.

A scatter plot with a white background and a black border. The x-axis and y-axis both range from -15 to 15, with major tick marks and labels at -15, -10, -5, 0, 5, 10, and 15. The plot contains several groups of data points: a large, dense cluster of gray points centered around (0, 0); a smaller, dense cluster of cyan points located roughly between x = -10 and x = 5, and y = -10 and y = 5; a single blue point at approximately (-11, -3); a single magenta point at approximately (-10, -7); and two small, separate clusters of gray points in the upper right quadrant, one around (15, 15) and another around (15, -15).

A scatter plot with a white background and black axes. The x-axis and y-axis both range from -15 to 15, with major tick marks and labels at intervals of 5. The plot contains three distinct groups of data points: a large, dense cluster of gray points centered around the origin (0,0); a smaller, dense cluster of cyan points located slightly to the left of the center, around (-5, -5); and a few isolated magenta points located further to the left, around (-10, -8).

A scatter plot with two main clusters of data points. The left cluster is cyan, and the right cluster is grey. A single magenta point is located near the center of the cyan cluster. The x-axis ranges from -15 to 15, and the y-axis ranges from -15 to 15.
