

A scatter plot with a coordinate system ranging from -20 to 15 on the y-axis. The plot features a large, dense cluster of points centered around (0,0). This cluster is composed of many small grey points, with a core of purple points and a surrounding ring of pink points. Two smaller, isolated clusters are located in the top right corner: one with a teal center and pink ring, and another with a yellow center and pink ring.

A scatter plot on a Cartesian coordinate system with x and y axes ranging from -20 to 15. The plot features a large, dense cluster of gray points centered around (0,0). Within this cluster, there is a dense core of magenta points. Two small, separate clusters are located in the upper right quadrant: one with a teal center and one with a yellow center. Both small clusters are surrounded by a ring of magenta points.
